

The Remote Agent PC 880 is delivered in a basic configuration with 4 serial ports, where two ports are equipped with a RS232 module. The other two ports require a port-module of your choice. There are modules available for two RS232, RS422/485 oder Current-Loop ports, the maximum serial port count is eight. Please note that optocoupled port modules require the option 'C' for the basic device.
